Objective

Aspiring to break into software development. My background includes having a solid grasp of the fundamentals of computer science. More recently, however, I have learned Python, SQL, Flask, HTML, CSS, and have become familiar with JavaScript and making API calls. I have made projects in these respective languages, HTML and Flask. Most notably, I have made a flask web application that allows users to login or register to access personalized notes from a database. This website is an example of my work. To view my portfolio, please visit my GitHub given above. Thanks for reading.

Experience

Tesla Nov.2020-Present
Production Associate

- Provide quality control for the rear under body of Tesla's Model Y vehicle.
- Particularly, I look for cracks, punctures, bents, or defects on the aluminum body that would compromise its integrity.
- I also prep the aluminum body for safer handling by removing rough edges.

Topline Auto Services Mar.2019-Nov.2019
Admin/Biller

- Helped establish the business as an LLC, paid insurance dues on time, and handled the majority of legal paperwork for the business.
- Periodically ensured OSHA standards were followed in the workplace and filed important documents. I also answered emails and used the company's credit card for purchases.
- Responsible for invoicing customers through Quickbooks, verified approved work and rates for vehicles, and issued credit returns.

Martin Auto Color Oct.2017-Mar.2018
Transporter

- I was responsible for retrieving, packaging, and delivering goods to customers. Ensured goods were safely secured for transport, drove company vehicles cautiously, and delivered to exact locations.

Education

Talbot School of Theology, La Mirada, Ca Jan.2013-Dec.2016
-M.A. in New Testament
-Graduated Magna Cum Laude

Biola University, La Mirada, Ca Jan.2009-Aug.2011
